## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1 – 8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
3. Claim 1 refers to a pick-up region but the specification describes the pick-up region as part of a silicon oxide layer that is doped with B. It is not understood what results from the doping of silicon oxide. Is it conducting?
4. Note also that claim 3 has (Ph) but the symbol for phosphorous is P, if that is what is intended. The same problem is seen in the specification.

### ***Allowable Subject Matter***

5. Claims 1 - 8 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.
6. Smayling et al. show a high voltage memory device memory device (see cover Figure) and note that high voltage transistors are required for various functions (column 1, line 35) which would normally be expected to use CMOS structures. A field stop region 17 is shown (see Figure 2) but it is not specified as being between p- and n-wells. A reach through layer 21 is shown which has a surface contact but it is not connected to the field stop region.
